

The expert mission of Mr. Manuel Sergi, professor of the University of Teramo was held in Kiev during 14 – 15 May. The meetings were organized at the State Centre of agricultural products certification and expertise and the State Research Institute of Laboratory Diagnostic and veterinary-sanitary expertise. These meetings were devoted to the validation of analytical methods for contaminants in Food using Gas and liquid chromatography.

After the theoretical part the visit of the laboratories of the State Centre of agricultural products certification and expertise was organized. During this visit different practical questions were discussed with the team of the laboratory: procedure of analyses results evaluation depending of the maximum tolerable level, definition of the maximum tolerable level, correspondence of the Ukrainian legislation to the EU regulation, decision making process and reporting of analyses results, possible consequences.

Mr. Manuel Sergi participated in the Spring school “Forward to the food safety: approaches in the implementation and carrying out of the European control of food safety” (Module in the framework of the programme Erasmus+ Jean Monet “EU food safety control”).

This event was organized by the team of NUBiP participating in the Erasmus+ Jean Monet “EU food safety control”. For “Ag-Lab” it was a good opportunity of the work in synergism with other Erasmus projects.
