

**The week of trainings in frame of the ERASMUS+ project AgLabcapacity building (University of Teramo, Italy)**

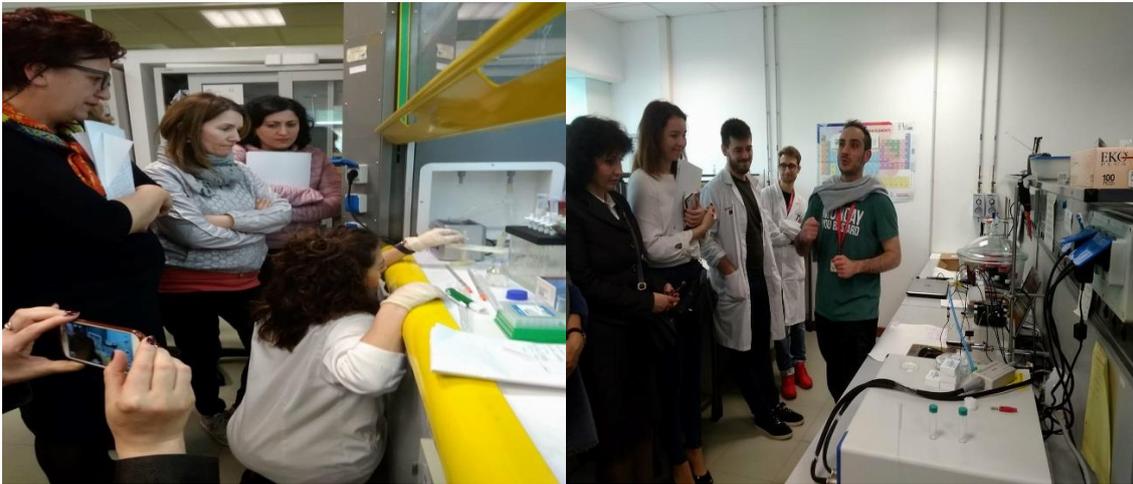

From May 9<sup>th</sup> to 13<sup>th</sup> the first week of training took place at the University of Food Technology and the Environment of Teramo (Italy) in frames of ERASMUS+ project AgLab capacity building. The trainings were held at the Faculty of Biological Sciences and Technologies and carried out by the professors of the University of Teramo.

The representatives of SMC "Agrosvita" as well as other consortium members - teachers of Odesa National Academy of Food Technologies, laboratory assistant of the State Center for Certification and Examination of Agricultural Products (Kyiv), our colleagues from the Tbilisi State University, Caucasus International University and a representative of the laboratory of Ministry of Agriculture of Georgia participated in this training.

Trainings were built according to the scheme “lecture-practical lesson”. It means all that we’ve heard during lectures, we could see with our own eyes in laboratories. It was a great experience for laboratory specialists, since they were able to learn modern methods of pesticides detection, using vacuum suction to stabilize food products and sensory analysis methods.

Besides university classes, our group visited some enterprises. A very interesting visit was to the company De Cecco (pastamaker) and the Citravini wine cooperative. At these enterprises technologists described and showed the process of products manufacturing, gave us the opportunity to visit workshops where we learned modern equipment in food industry.

A visit to the official National laboratory of pollutant detection, bioenergy and veterinary examination was interesting not only for laboratory staff, but for ordinary people as well because the quality of food products and compliance with the rules for the manufacturing and food preservation touches upon all of us.

frankly speaking, a week of trainings was intense, interesting and educational. University professors and laboratory specialists got a great experience that would be useful to them in their professional activities. Thanks to the ERASMUS + project, representatives of 19 organizations will improve their qualification (19 is the number of universities and laboratories involved in the project).

## Certificate of Participation

It is hereby certified that Doctor Olga Getya representing the SMC "Agroosvita" participated in the Staff Training Week within the Erasmus+ programme Capacity Building "AgLab" project held at the University of Teramo (Università degli Studi di Teramo), Faculty of Bioscience and Technology for Food Agriculture and Environment, Teramo from 9<sup>th</sup> to 13<sup>th</sup> April 2018.
